Core Front-End Skills: Responsive Design, UI/UX Implementation, Accessibility (WCAG), State Management, API Integration, Performance Optimization, SEO Best Practices, Testing & Debugging

Soft Skills: Communication, Problem-Solving, Attention to Detail, Teamwork, Adaptability

## EXPERIENCE

Front-End Developer | Delta State Health Information & Appointment Booking System

2024 – Present

- Led the front-end development of a full-stack health platform that allows users to find nearby clinics, book appointments, access medical information, and manage health records.
- Built an intuitive and responsive user interface using Next.js, Tailwind CSS, and REST API integrations.
- Collaborated with the backend team to ensure seamless data flow and implemented real-time updates for appointments and notifications.
- Focused on accessibility, usability, and performance optimization across devices.

Technical Writer & Community Manager | Nelo

2025 – Present

- Create and manage technical documentation, blog content, and community resources that simplify Nelo's blockchain and crypto features.
- Collaborate with developers and designers to translate complex concepts into clear, engaging communication for both users and partners.
- Lead community engagement efforts across platforms, driving awareness, participation, and brand growth.

Front-End Development Intern | Mrsoft International

2024

- Played a key role in rebuilding two enterprise-grade e-commerce applications with scalable front-end logic and performance-focused UI design.
- Engineered modular, reusable React components and streamlined API integration for real-time product and cart management.
- Partnered with backend engineers to ensure seamless communication between front-end and server-side systems.
- Enhanced user experience through responsive design, accessibility improvements, and optimized site load speed.
- Contributed to Agile development sprints, Git-based collaboration, and end-to-end testing workflows.

Freelance Front-End Developer & Technical Writer | Remote

2022 – Present

- Designed and built modern, mobile-friendly websites for brands across industries, including e-commerce and beauty.
- Developed full front-end interfaces for businesses, integrating payment systems, booking features, and content management tools.
- Translated client visions into pixel-perfect websites using React.js, Bootstrap, and Tailwind CSS.
- Produced technical documentation, API guides, and blog posts that simplify complex topics for both technical and non-technical readers.
- Delivered fast, optimized, and scalable front-end solutions that improved user engagement and conversion rates.

## PROJECTS

- Nelo (Crypto Fintech App): Ongoing fintech project that allows users to spend crypto like regular money using digital cards.
- Delta Health Booking System: Full-stack application that connects patients to rural clinics, featuring booking, health info, and SMS alerts.
- E-Commerce & Brand Websites: Built and deployed responsive, SEO-optimized websites for online stores and beauty brands.
